Evaluation Criteria

Rate each criterion and provide brief evidence or notes. Use: Meets, Partially meets, Does not meet, NA

Criterion	Rating	Evidence / Notes	Meets Criteria?
Alignment with Learning Objectives	Meets		
Content Accuracy & Reliability	Meets		
Currency / Relevance	Meets		
Quality of Materials / Production Quality	Meets		
Clarity, Readability & Organization	Meets		
Modularity & Adaptability (Remix potential)	Meets		
Interactivity & Learner Engagement	NA		
Accessibility / ADA Compliance	Partially meets	See detailed sub-criteria below	
License Supports Intended Use (Reuse/Remix/Share)	Meets		
Additional Criterion (specify): _____	NA		

Accessibility / ADA Compliance Details

Note issues:

- Alt text provided for informative images, charts, and graphs
  - NA
- Captions and/or transcripts for audio/video
  - NA
- Sufficient color contrast
  - Active controls are low contrast
- Compatible with screen readers / keyboard navigation
  - Yes
- Tables have proper headers; no merged cells issues
  - Yes
- Other accessibility notes

- None

Summary / Comments

Overall Assessment & Recommendation:

Recent OER that aligns closely with pain management mini course for paramedics. Strengths include coverage of factors that influence the perception of pain (a topic often overlooked in EMS education), attention to bias and culture, and open license allowing adaptation. Limitations are limited interactivity.

Strengths: Covers neglected topic of how perception of pain is influenced patient from patient

Limitations / Areas for Improvement: Lack of interactivity, common for clinical guidelines

Alignment with specific CLO / Module Objective: 1: Identify key indicators and contraindications for pain management in special-case prehospital scenarios, including sickle cell crisis, burns, renal colic (kidney stones), eye trauma, crush or compartment syndrome, dive injuries, and palliative care for patients with DNR/MOLST orders, in alignment with the Maryland Medical Protocols (MIEMSS, 2025).

Decision: ☐ Adopt as-is ☐ Adopt with adaptations ☐ Do not adopt ☐ Needs further review
