OER / Digital Media Evaluation Checklist

RESOURCE IDENTIFICATION

Evaluator Name:	Mark Johnson
Date:	11/8/26
Resource Title:	Palliative Care in EMS: Managing Acute Pain Under MOLST Option B
Resource URL:	https://youtu.be/obemkFMy28M
License:	Creative Commons Attribution-ShareAlike 4.0 (CC BY-SA 4.0)
Intended Audience:	Paramedic Continuing Education
Applicable Standards:	Maryland Medical Protocols

EVALUATION CRITERIA

Rating Scale: 3 = Good | 2 = Acceptable | 1 = Not Acceptable | NA = Not Applicable

Criterion	Rating (3/2/1/NA)	Evidence / Notes	Meets Criteria?		
Alignment with Learning Objectives / CLOs	3		☑		
Content Accuracy & Reliability (general)	2	The demonstrated IN technique is described correctly but not illustrated correctly, the same with the bent knee spint	☐		
Clinical Accuracy (evidence-based, medically correct, protocol-consistent)	2	"	☐		
Recency / Currency of Clinical Content (guideline dates, last update, current standards)	3	Description of MOLST considerations matchess current protocol	☑		
Alignment with Applicable Standards (MD protocols, ACLS, PALS, NREMT, etc.)	3		☑		
Quality of Materials / Production Quality	1		☐		
Clarity, Readability & Organization	2	Some of the dialogue is garbled and requires redoing	☐		
Modularity & Adaptability (Remix potential)	3	The video could be adapted for courses on MOLST ethics and pain management in general	☑		
Interactivity & Learner Engagement	2	No interactivity, does present a realistic scenario and explains the why, not just the how.	☑		
Accessibility / ADA Compliance	3	See details below	☑		
License Supports Intended Use (Reuse/Remix/Share)	3	Requires attribution under CC	☑		
Suitability for Intended Audience (paramedic students / paramedics)	3	Explains the ethics behind MOLST decision making	☑		
Additional Criterion (specify):	NA		☐		

ACCESSIBILITY / ADA COMPLIANCE DETAILS

Alt text provided for informative images, charts, and graphs	NA
Captions and/or transcripts for audio/video	Yes
Sufficient color contrast	Yes
Compatible with screen readers / keyboard navigation	NA
Tables have proper headers; no merged cells issues	NA
Logical heading structure	NA
Other accessibility notes	NA

SUMMARY / COMMENTS

Overall Assessment & Recommendation:

The explanation of etchics behind pain management is current and correct. Dialogue needs to be redone, and the video demonstrating IN and splinting technique needs to be done. As a proof of concept the video is promising. Work with developer to correct illustrated techniques and investigate AI video techniques to help keep consitency between scenes to help maintain learner engagement.

Strengths:	Good explanation of ethics behind treatment of Option B patients
Limitations / Areas for Improvement:	Technique demonstrations
Alignment with specific CLO / Module Objective:	CLO 1

Decision:

☐	Adopt as-is
☑	Adopt with adaptations
☐	Do not adopt
☐	Needs further review

Rating Scale: 3 = Good | 2 = Acceptable | 1 = Not Acceptable | NA = Not Applicable. Yellow cells are for input.
